

Post-Doc Position

is open now in the Solid State Spectroscopy Group of the Institute of Solid State Physics of the TU Wien.

TU Wien is renowned within the international scientific community for its excellence in research. Vienna has been ranked multiple times the most livable city in the world.

Details

Full-time position for 2 years, starting from 2021 January, salary approx. 54.5 kEUR/year (before taxes)

Topics

Time-domain THz and far-infrared experiments in materials and systems of modern solid-state physics (multiferroics, metamaterials, topological insulators, etc.). Own ideas are also welcome.

Development of experimental techniques, especially for THz spectroscopy in magnetic fields.

Requirements

PhD degree in solid-state physics or spectroscopy, excellent scientific record, fluency in English

Applications

should be send electronically in a single .pdf file including letter of motivation, description of previous experience, CV, list of publications, copies of the certificates, names of two possible referees.

Additional information

is available at <http://www.ifp.tuwien.ac.at/spectroscopy>
